

As a member of XM radio I cant help but to complaint to the FCC.The NAB feels threatend for who knows whatever reason. The fact of the matter is I am paying for this service. If it was not on demand it would not even be considered by XM radio to broadcast it. If radio stations provided better service and did not lose any ratting this would probably not even be an issue. Unfortunetly the NAB is a business driven by the bottom line (profit) as well as XM radio But the difference is I am paying for this service and not commercial advertising. That is why they are trying to petition to stop XM radio from what I want and need. Last I checked Monopoly was illegal in the United States. Competition is what drives free Enterprise and what the NAB is trying to do is illiminated. Im against this petition 04-160
